Xam - A Tale of Vietnamese Folk Music

Xam is known in Viet Nam (21) folk music usually performed by blind street singers (22) their living. As it originated from the working class and poor people, Xam has become an intellectual part of the folks' cultural life. Its most distinctive features lie in the simplicity and popularity of its

lyrics which often tell daily-life stories, satirizing and criticizing severely the (23) evils while highly praising education and humanitarian (24)

This is part of a report by the Chairman of the Charities Committee of a Club.

By Match this year, we shall have raised enough money, we hope, to buy the equipment for the Youth Club. When we have raised the money, we are planning to go back to the Youth Club leaders in order to discover exactly what is needed most. Plans have been made for the Book Sale which will be held on 15th February, This means that many of us will be spending the first two weeks of February collecting books. The event is likely to be held in the Town Hall. If there are problems here, however, we hope that other Club members might come up with some alternative suggestions.

As we are proposing to sponsor a student from Africa on a three-month language course in this country, we also intend to hold a Charity Dance in the spring. Such events are apt to be difficult to organize, so all members of the Club are invited to contribute or help in any way they can.

The moment I was asked if we could possibly help in some way with the new Club for the Disabled, I said yes. As Chairman, I am bound to say that this is the sort of social work many Club members would like to do, other than simply raising money. We are therefore planning to ask members if they can perhaps help our one Saturday every month.

Xam - A Tale of Vietnamese Folk Music

... Therefore, Xam doesn't care so much about costumes and stages like other types of traditional arts. Xam singing can be performed (21) on any street or corner where large numbers of people pass. It is so simple that anyone can sing some verses to express their inner (22) on life.

After a long period of decline, Xam has recently been revitalized by a programme titled "Tale of Xam" performed by master artists of Vietnamese traditional music through their beautiful vocals and talented musical skills. The artists performed in such a simple way without accompaniment in order to (23) the soul of Xam performed by our forefathers. The effect of the programme could (24) through the joy of audiences and their enthusiastic talks with the artists.

II. Read the passage and choose the best answer A, B, C or D.

Music influences people in different ways or the same person differently at different times. Music may seem to influence people differently. That is because people can react differently to the music. We are able to apply a choosing a process to the music we hear. If someone hates jazz, then a jazz piece with a positive effect will probably not make him feel good. A happy song might appear to make an angry person angrier, yet it is not the music itself that is creating the anger; rather it is the positive effect of the music. The angry person does not want to accept the song's happy feeling: it points out his already existing anger, and makes that anger come to the surface. When a piece of music is played and we are listening to it, our body, mind, and feelings are being affected. The musicians of ancient cultures such as China, India, Turkey and Greece understood the effects of music. In fact, Pythagoras, in ancient Greece, introduced a whole science that concerned them. Because the musicians of these ancient cultures understood these effects, they created music that was positive, uplifting, and beneficial. Once the effects of music are better understood, the next step is to gain a better understanding of the music around us, and what effect it is actually having.
